## PROFILE

---

I am a fourth-semester computer science student with a proficient foundation in backend development using Node.js, Express.js, and MongoDB. My experience includes collaboratively managing and developing a web-based platform. This role highlighted my abilities in teamwork and project management. Passionate about leveraging technical skills in a real-world setting to contribute to digital transformation. I am eager to learn from industry experts and enhance capabilities in developing real-world scalable applications.

## EDUCATION

---

**Bina Nusantara University**

Undergraduate Computer Science

**Jakarta, Indonesia**

Cumulative GPA: 3.7

**SMA Santo Yosef**

Mathematics and Science

**Bangka Belitung, Indonesia**

Final Score : 88

## PROJECT

---

- **MindShare Web Forum** - I served as Project Manager and Full-Stack Developer, I took the lead in creating the MindShare Web Forum, a community-centric platform designed to support credible discussions on mental health. The project utilises Node.js, Express.js, MongoDB, HTML, and CSS. My role encompassed both managing a dynamic team and executing technical tasks, including developing backend functionalities and crafting intuitive user interfaces. The platform uniquely supports verified contributions from mental health professionals, enhancing the trustworthiness and relevance of the discussions.
- **MakeMeUpzz** - I served as the Team Leader, leading the development of a web application focused on the backend, specifically built using ASP.NET and SQL, with a domain-driven design architecture. My responsibilities included guiding the team, coding, and ensuring the integration of various layers such as the View, Controller, Handler, Repository, Factory, and Model layers.

## EXPERIENCE

---

**UREEKA BINUS**

Internal Division

**Jakarta, Indonesia**

Ureeka is an organization within the School of Computer Science at Bina Nusantara University, dedicated to enhancing skills in software development and application.

- Developed training course outlines.
- Organized a training sessions.
- Sourced and recruited trainers for various programs.

## SKILLS

---

- **Languages:** English, Indonesia.
- **Programming Languages:** HTML, CSS, Javascript, Python, Java, C, Bootstrap.
- **Framework:** NodeJS, ExpressJS, .NET.
- **Databases:** SQL, MongoDB.
- **Tools:** Git.
